

# Automated Web Testing with Selenium using Hidden Waffle in C#

## Duration

---

8 Hours \\ 3 hour lecture, 3 hour on hands supervised coding

## Who should attend

---

- People whose bread and butter is associated with Software Quality Assurance
- And they are interested in improving their skill set
- And have basic understanding of programming using C#
- Aggressive about their careers

## So Selenium is okay, what is Hidden Waffle?

---

Hidden Waffle is an open-source initiative by Fahad Khalil. This is a set of classes which makes writing test-cases with Selenium an extremely pleasant experience. It contains extendable set of base classes containing rich functionality and a runner, which can be used to write any type of test execution scenario and environment.

## What you will get?

---

- Few ounces of extremely digestible knowledge, using which you can build a shiny skill
- (Optional) How to setup AWS and automate the testing
- On hands supervised coding experience
- Tea and cake on the house!
